How to read this

Every finding states its confidence: "Verified" was read directly from a file structure or checked cryptographically; "Derived" follows from what was read by a fixed rule; "Heuristic" is a rule's guess and may be wrong. Entries with severity "Info" are neutral facts, not problems.

Findings of the same rule are shown as one entry: a sentence that repeats is written once, followed by the files it holds for. Long lists show their first items and say how many are left out; the evidence and ID of every finding are in report.html and report.json.

This PDF is for reading and filing: long lists are cut and say so; report.html and report.json hold the complete data.

14 Coverage and limitations

Every file in the tree was read in full.

Trust was not evaluated online or against system policy (1)

Every signature check was made offline: certificate revocation was not queried, expiry as of today was not judged, Apple was not asked about notarization, and Gatekeeper's policy was not simulated (requirement expressions were not evaluated). “Verified” in this report covers only the checks it names.
